Powering connections that matter.

CORE VALUE PROPOSITION

1 End-to-End Telecom Enablement

e7 provides a complete lifecycle solution covering:

-  SIM manufacturing
-  eSIM provisioning
-  Personalisation
-  Packaging
-  Fulfilment
-  Remote provisioning platforms

This creates a single integrated partner model that **reduces operational complexity** and **accelerates deployment**.

FLEXIBLE DIGITAL PROVISIONING

eSIM capabilities enable:

-  **Remote SIM provisioning (RSP)**
 - Provision and manage profiles securely, anytime, anywhere.
-  **Instant activation**
 - Enable connectivity in seconds with over-the-air provisioning.
-  **Reduced physical dependency**
 - Move beyond physical SIMs and streamline operations.
-  **Digital onboarding experiences**
 - Deliver seamless, paperless and frictionless customer journeys.
-  **Faster customer acquisition**
 - Reduce time-to-market and convert more customers, faster.

Supporting fully digital telecom journeys while **lowering logistics and operational costs.**

SCALABLE OPERATOR SOLUTIONS

e7 offers:

Quick scalability

Scale effortlessly to meet growing demand and new opportunities.

Telecom-specific customisation

Tailored solutions to fit unique business models and market needs.

OTA updates

Update profiles and configurations remotely and securely.

Consumer and enterprise profile management

Manage multiple profiles and segments efficiently from a single platform.

Operators can rapidly scale services while tailoring offerings to **specific market and customer requirements.**

Lower Costs

Reduce logistics, inventory and operational overhead.

Faster Time-to-Market

Launch new offers and services in record time.

More Agility

Adapt quickly to market changes and customer needs.

Better Experience

Deliver seamless, intelligent and personalised connectivity.

Future-Ready

Built for 5G, IoT and the next generation of connectivity.

FUTURE-READY CONNECTIVITY

Solutions support:

2G / 3G / 4G / LTE / 5G

Full generation support for seamless connectivity today and tomorrow.

Smartphones

Powering the world's connected experiences.

Wearables

Enabling always-on connectivity on the go.

IoT Devices

Connecting devices. Transforming industries.

Global Roaming Applications

Reliable connectivity anywhere in the world.

Enabling telecom providers to support both current and emerging digital ecosystems with **scalable connectivity solutions**.

SECURE BY DESIGN

e7 solutions are built around strong security and compliance standards:

GSMA-compliant eUICC platforms

OTA provisioning support

Secure element & applet management

Multi-IMSI capability

ISO and GSMA security compliance

This ensures **trusted** subscriber authentication, **secure** remote profile management, and **protection** of sensitive customer data.

Built for Today.
Ready for Tomorrow.

Scalable Solutions.
For Any Network.

Global Reach.
Local Impact.

Secure by Design.
Trusted Worldwide.

Sustainable Solutions.
For a Connected Future.

SUSTAINABILITY & ECO-FRIENDLY MATERIALS

The proposition includes:

Recyclable materials

We use eco-friendly and recyclable materials to minimise environmental impact.

Sustainable manufacturing

Our processes are optimised for energy efficiency, waste reduction and responsible resource use.

Reduced physical card dependency through eSIM

eSIM technology reduces the need for physical SIMs, lowering logistics, packaging and carbon footprint.

Helping telecom operators align with **ESG** and sustainability objectives.

CERTIFICATIONS & COMPLIANCE

Our partner E7 operates under internationally recognised security, quality, and telecom industry certifications, ensuring trusted, compliant, and carrier-grade SIM and eSIM solutions:

GSMA SAS
(Security Accreditation Scheme)

ISO 27001 – Information Security Management System

ISO 9001 – Quality Management System

ISO 14001 – Environmental Management System

ISO 45001 – Occupational Health & Safety

ISO 22301 – Business Continuity Management System

ISO 50001 – Energy Management System

ISO 14298 – Secure Printing Process Management

PCI Card Production & Provisioning Compliance

Mastercard CQM Certification

CEC Eco Certification

These certifications demonstrate **FibreNomics** commitment to:

Telecom-grade security

Data protection

Operational resilience

Sustainable manufacturing

Global industry compliance

For a Greener Tomorrow
Sustainable choices today for a better tomorrow.

Innovate. Connect. Sustain.
Driving connectivity while protecting our planet.

Less Plastic. More Impact.
eSIM for a smarter, lighter future.

Responsible by Design
Building solutions that are good for people and planet.

Stronger Together
Partnering for a sustainable, connected world.

STRATEGIC DIFFERENTIATORS

Delivering secure, scalable and future-ready SIM and eSIM solutions that power the world's connectivity.

End-to-end manufacturing and provisioning

Complete lifecycle from SIM/eSIM manufacturing, personalisation to provisioning under one roof.

Integrated fulfilment and packaging

Seamless fulfilment and custom packaging solutions that ensure speed, accuracy and a superior experience.

Global certifications and compliance

Internationally recognised certifications ensuring the highest standards of quality, security and compliance.

Secure telecom-grade infrastructure

Built with advanced security controls and robust infrastructure to protect data and ensure reliability.

Rapid scalability

Agile operations and scalable platforms to support growing demand across consumer, IoT and enterprise.

Remote provisioning expertise

Deep expertise in RSP and eSIM platforms enabling secure, seamless and instant connectivity.

Future-ready 5G and IoT support

Designed for today and tomorrow with 2G–5G, IoT and wearable connectivity solutions.

Trusted.

Security at every layer.

Proven.

Certified. Compliant. Reliable.

Partnered.

Your growth is our mission.

Sustainable.

Solutions for a connected future.
